About Me

Computer Science undergraduate with experience in Artificial Intelligence, Machine Learning, and Deep Learning, passionate about building scalable AI systems and conducting AI research, with additional experience in full-stack development using the MERN stack.

Education

Maharaja Surajmal Institute of Technology **Aug 2024 – Sep 2028**
B.Tech in Computer Science and Engineering *New Delhi, India – 110059*
- Guru Gobind Singh Indraprastha University | SGPA: 8.2, CGPA: 7.66

Kamal Model Sr. Sec. School | *Class XII* **Completed 2024**

Skills

Programming Languages: C++, Python, JavaScript
Full Stack Web Development: React.js, Node.js, Express.js, MongoDB, Firebase, REST APIs
Machine Learning & Data Science: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib, SymPy
Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Developer Tools & Platforms: GitHub, Kaggle, Postman, Jupyter Notebook, Google Cloud, Streamlit, VS Code
Frontend Technologies: HTML, CSS, Tailwind CSS

Work Experience

AI/ML Intern **Apr 2026 – Present**
DomAIyn Labs | Internship *County Dublin, Ireland – Remote*
- Developed and curated datasets for AI blue-teaming and safety evaluations.
- Contributed to early-stage red-teaming efforts to identify model vulnerabilities and risks.
- Trained, fine-tuned, and evaluated ML/LLM models for performance and robustness.
- Performed research and analysis on AI safety, reliability, and alignment challenges.

Research Intern **Jun 2026 – Jul 2026**
DRDO, Ministry of Defence, Govt. of India | Internship *On-site*
- Designed and built Sentara, an AI-based framework for network intrusion and malware detection.
- Trained and benchmarked MLP and Random Forest models on NSL-KDD and malware datasets.
- Deployed the models via a FastAPI backend and React frontend for real-time threat prediction.

Web Developer **Oct 2024 – Dec 2025**
Geek Room | Apprenticeship *Delhi, India*
- Built responsive and interactive web applications using modern frontend technologies.
- Delivered multiple client and campus-initiative websites end-to-end, from design to deployment.
- Collaborated with designers and peer developers to ship polished, interactive user interfaces.

Academic Projects

AI Bouncer | *FastAPI, XGBoost, DeBERTa-v3, FAISS, PyTorch, Next.js* **[Link]**
- Built an AI prompt firewall to detect jailbreaks, prompt injections, and adversarial prompts using a cascading ML pipeline.
- Designed a low-latency moderation system with semantic retrieval and transformer-based verification.

Brave Custom Tab – New Tab Extension | *JavaScript, GSAP, HTML/CSS* **[Link]**
- Developed a customizable Brave/Chrome new tab extension with video wallpapers, animated search UI, and pinned favorite sites.
- Implemented interactive GSAP animations and local persistence using Chrome Storage APIs.

Sentara – Cyber Threat Detection | *Python, FastAPI, React, Scikit-learn* **[Link]**
- Built an end-to-end pipeline for network intrusion and malware detection using NSL-KDD data.
- Trained DNN and Random Forest models, evaluated via accuracy, precision, recall, F1, and ROC-AUC.
- Deployed the models via a FastAPI backend and React frontend for real-time predictions.

Achievements & Certifications

- 1 x Ideathon Win in MSIT
- Supervised Machine Learning: Regression and Classification
- AWS Educate Introduction to Generative AI - Training Badge
- Google Gemini for Google Workspace
